

University of Minnesota School of Dentistry Moos Tower Dental Simulation Laboratory

Project Summary

This state-of-the-art interactive computer simulation laboratory was developed for first and second year dental students to provide for experiential learning. The \$7 million project included a teaching lab for 100 students, support labs, conference rooms and a 20 station computerized simulation lab.

Unique Characteristics

- Extensive demolition & mercury and asbestos abatement
- Individual computerized lab work stations
- Extensive plumbing, compressed air and natural gas requirements
